Of these it implemented 417 activities, which accounts for 84.4% of the total programmed activities, hence recording a significant increase compared with the third year of the Action Plan (2001-2003) where only 334 activities were implemented. He added that a total amount of US$ 11,106,636 was spent in the implementation of this year’s activities, in which ISESCO share amounted to US$ 4,490,300, while the contribution of cooperating parties reached US$ 6,616,336.

At the end of the discussions, the Council approved the Report of the Director General on ISESCO’s Activities between the 26th and 27th Council Sessions, while taking account of the observations and recommendations of the Council members. The Council recommended the 9th General Conference of ISESCO to adopt this report.

7. The Director General submitted his reports on the role of ISESCO in supporting educational, scientific and cultural institutions in Al-Quds Al-Sharif, Palestine, Bosnia and Herzegovina, Somalia, Afghanistan and Iraq. They cover all activities and programmes implemented by the Organization for the benefit of these countries, according to their needs and conditions, and pursuant to the recommendations of the Executive Council and the General Conference which call for giving special attention to these countries in the programmes and activities of the Organization.

Afterwards, the Director General surveyed the activities implemented by the Organization with regard to Al-Quds Al-Sharif and Palestine, in cooperation with the Palestinian National Commission for Education, Culture and Science, which substituted for the Organization in the implementation of those activities. He pointed out to the most important of those actions, such as the provision of material and technical support for the Palestinian educational institutions, the qualification of their staff and officials, mainly in the field of education of persons with special needs, in addition to the protection of archaeological landmarks and Islamic and Christian sanctities, and the granting of scholarships.

As to the activities geared to Bosnia and Herzegovina, the Director General highlighted the limited character of the implemented activities because the Organization’s General Directorate did not receive the required response from the competent parties in due course. Concerning the activities geared to the Islamic Republic of Afghanistan, and given the specific nature of the reality of this country, and seeking to facilitate communication with the competent authorities in Afghanistan, ISESCO has
implemented, through its Tehran Regional Office, a number of activities for the benefit of Afghanistan. The most important of these include the creation of ten (10) reading centres, the provision of material and technical support to educational institutions interested in women education, the supply of office and audiovisual equipment to the Afghan National Commission, in addition to the organization of some training sessions on the education of the disabled.

In terms of the activities allocated to Iraq, the Director General explained that it was impossible for the General Directorate to implement activities in this country. Accordingly, the General Directorate, in coordination with the competent authorities, held a number of training sessions for the benefit of Iraqi researchers and experts in Damascus, Amman and Cairo, in architectural restoration, the administration of archaeological sites, and the documentation of museum assets. In addition to that, it provided the Iraqi National Commission with office equipment. In this regard, the Director General extended his thanks and appreciation to the competent authorities in the Hashemite Kingdom of Jordan, the Syrian Arab Republic and the Arab Republic of Egypt for their cooperation with the Organization in implementing the activities geared to Iraq. He expressed his wishes that the Member States concerned with those activities restore their peace and stability in the shortest possible time.

8. **During the discussions**, the Council members commended the support which the Islamic Organization gives to the educational, scientific, cultural and informational institutions in Al-Quds Al-Sharif, Palestine, Bosnia and Herzegovina, Somalia, Afghanistan and Iraq. *Their remarks centred on the following:*

The Council recommended the 9th General Conference of ISESCO to adopt these reports.

9. The Director General presented his Report on the Programme of ISESCO’s Ambassadors for Dialogue among Cultures and Civilizations, wherein he stressed the interest ISESCO takes in this subject, pursuant to the provisions of ISESCO’s Charter and drawing on the resolutions and decisions of the General Conference and the Executive Council as well as the recommendations of the Islamic conferences of culture ministers held by the Organization. The objective of the programme is to elaborate an Islamic vision to dialogue aiming at consolidating this concept, its methodological foundations and working mechanisms, through dedicating a number axes to this subject in the Organization’s successive action plans.

Moreover, the Director General pointed out to the fact that ISESCO has been commissioned by the Islamic world to follow up the subject of dialogue among civilizations. In this regard, it held a large number of Islamic conferences and international symposia that yielded concrete results. In addition, the Organization has published an integrated set of studies and researches on dialogue among cultures and civilizations which touched upon the bases, mechanisms, fields and constituents of dialogue in Islam; one of these major publications is the “White Book on Dialogue among Civilizations”, which was published in two editions in the three working languages. This book has become a reference document in specialized meetings. By the same token, ISESCO’s efforts have culminated in the creation of honourary posts titled “ISESCO’s Ambassadors for Dialogue among Cultures and Civilizations”. Accordingly, four ambassadors have been nominated so far and granted ISESCO’s Medal, namely His Royal Highness Prince El Hassan bin Talal, President of the Arab Thought Forum; His Excellency Dr. Mahathir Mohamad, former Prime Minister of Malaysia; His Excellency Mr. Amadou Mahtar M’Bow, former Director General of UNESCO; and Mrs. Mehriban Aliyeva, President of Heydar Aliyev Foundation and Spouse of the President of the Republic of Azerbaijan. At the end of his presentation, the Director General gave an account of the functions of these Ambassadors, which they have accepted in principle. These functions include, among others, giving lectures in Islamic and international forums in order to highlight the Islamic values and principles related to dialogue among cultures and civilizations; offering counsel to ISESCO Director General and the Organization’s statutory bodies on the most efficient mechanisms to elaborate an
Islamic vision in this connection; and proposing programmes and field projects in accordance with the Member States’ needs and priorities.

10. Then, the Director General presented the Report on the Evaluation of the Organization’s Action for the Years 2004-2006. He emphasized the keenness of the General Directorate to improve the mechanisms of internal and external evaluation of programmes, activities and projects implemented under the Organization’s action plans.

He further stated that this report includes two parts. The first one analyses the main achievements realized in the 2004-2006 Action Plan, whereas the second part features a qualitative and quantitative evaluation of implemented activities. He also underlined that this evaluation was based on the feedback of participants in and benefiting parties from the implemented activities, as well as on the information contained in the reports of the National Commissions and experts, and on the conclusions of field studies.

The Director General pointed out that the quantitative evaluation covered a total of 1252 implemented activities, representing 86% of the overall activities scheduled under the Organization’s Action Plan for 2004-2006. He considered that this accomplishment illustrates the developed methods used in the implementation
of activities in comparison with the previous action plan. He added that being convinced of the need to expand the scope of international cooperation, the Organization has significantly increased its cooperation activities, which stand at 887 activities under the current plan compared with the previous one, during which 775 activities were scheduled.

As for the qualitative evaluation of activities, the Director General said that the General Directorate has paid a special care to the study of the field effects of implemented activities. The aim is to examine their efficiency, relevance and the adequacy of the implementation means. To this end, the General Directorate drew on the data of questionnaires of participants and National Commissions, reports drawn up by experts, and the reports of the benefiting parties. The General Directorate thus noted the appreciation and satisfaction expressed with regard to the implemented activities, taking into account the observations and opinions which expressed the need to develop the implementation means of some activities, expand their time frame and choose more appropriate venues for implementation.

11.
